PROFILE

Front-end developer with 7+ years of experience building scalable, user-focused web applications with React and TypeScript. Full-stack experience with Node.js, Express and MongoDB means I can follow a feature end to end, with an eye for clean architecture, performance and maintainability. AI is a core part of my workflow: I use Claude Code and MCP tooling across development, debugging, refactoring and automation.

SKILLS

Front-end	React, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Apollo/GraphQL
Back-end	Node.js, Express, MongoDB
Testing & tools	Jest, Playwright, Git, Linux, Claude Code and MCP tooling
Languages	French (native), English (professional), Korean (intermediate)

EXPERIENCE

Cloudike cloudike.kr Jul 2022 – Present
Front-end Developer | React · Next.js · TypeScript · Apollo/GraphQL · Tailwind CSS · Jest/Playwright Pangyo, South Korea

- Maintain and evolve the main Cloudike web application — implementing new designs, shipping features and fixing issues across the product
- Refactored the application codebase to meet the requirements of CSAP, South Korea's government cloud-security certification
- Developed an in-browser PDF document viewer built on pdf.js

Yettey yettey.ai

- Built a non-destructive image editor with a transformation pipeline, enabling composable, reversible image edits in the browser
- Developed features for an AI chat experience that generates images from prompts

Vpick vpick.ai

- Integrated in-house AI APIs that generate short-form clips from a source video
- Worked on an in-browser short-form editor — subtitle editing plus image and audio asset overlays

Lux PM / Luxolis Sep 2021 – Jul 2022
Full-stack Developer | React · Tailwind CSS · Express · MongoDB · Three.js Pangyo, South Korea

- Client projects**
- Built client applications from scratch across several projects — React, Next.js and Tailwind CSS on the front end, Express/Node.js on the back end
 - Developed the core logic of a project-management system, notably data tables with unlimited user-defined rows and columns, where each column carries its own type (number, dropdown, user assignment, text, file)

3D Viewer

- Built a Three.js 3D viewer with measuring tools, letting users load LiDAR-scanned models and take measurements directly on them

The Missing One Sep 2019 – Jun 2021
Full-stack Developer | React · Node.js · MongoDB · Elasticsearch Nancy, France

- Built a job-matching platform connecting developers and companies: company registration and job listings, developer profiles with skills and résumé upload, and recommendations matching candidates to each listing
- Integrated Elasticsearch to speed up search across profiles and job listings
- Owned the product beyond the code — contributed to feature decisions and project direction

EDUCATION

Epitech, France — Master's-level Diploma in Information Technology 2015 – 2020
Diplôme d'Expert en Technologies de l'Information, Programme Grande École

Keimyung University, South Korea — Exchange year: game design and programming 2018 – 2019
